## Air Systems Announces It's New Energy Efficiency Audit & Partnership Program

Are you interested in knowing how energy efficient your facility is, or need assistance with planning and managing future and existing facility operations to keep energy costs under control? Air Systems, your total facilities solution provider for the past 35 years, can help with our free Utility Audit program. Our Utility Audit program will help you understand and track your facility's operating costs, reduce energy, and help start you down a path toward a sustainable future.

### **Our Utility Audit Program includes:**

- Benchmarking with Cal-Arch
- Benchmarking with Energy Star
- Electricity/Gas Usage Analysis
- Electricity/Gas Baseline
- Estimated Annual Billing and Usage Analysis
- Load Factor Analysis
- Average Daily Electricity Usage

### **Required Documents for Utility Audit**

- Copies of January 2008-current utility bills
- Completed Energy Star Information Sheet (Provided by ASI)

This interactive analysis is intended to help evaluate the areas within a facility where energy could be used most efficiently from both a cost and utilization standpoint. For more information or to get started today please contact us at [energyefficiency@airsystemsinc.com](mailto:energyefficiency@airsystemsinc.com)

*Intentions of all services stated above will be performed unless otherwise stated. ASI reserves the right to perform services based on building applicability and available resources.*
