

“Together We Can Build Our Childrens’ Future!”

“Without the help of Air Systems Foundation, we would not have been able to expand our services to the needy children of east San Jose. Their grant allowed us to purchase and convert a motor home into a mobile clinic. This mobile clinic now goes to five locations and sees over 50 children per month. As a result of the mobile clinic visiting Foothill High School on a weekly basis, we were asked to open a clinic at Independence High School, where we are now seeing 6–8 teenagers each day. The continued support of Air Systems Foundation has made a real difference in the available quality health care to the children of Santa Clara County.”

Vincent G. Bradley, South Bay Children’s Medical Center

“The Air Systems Foundation has provided tremendous support for the Boys & Girls Clubs of Silicon Valley. For the past several years, they have helped fund our Health & Life Skills program, where we teach youth about nutrition and fitness, as well as providing necessary resistance skills for kids to avoid alcohol, tobacco and other drugs. The Air Systems Foundation, Inc. support has been critical to the success of the Boys & Girls Clubs of Silicon Valley.”

Teresa Johnson, Boys & Girls Club

“The Air Systems Foundation, Inc. is concerned with the well-being of the whole child, their health, basic needs, family structure and education, both formal and informal. By sponsoring interactive exhibits, such as the Museum’s WaterWays, Air Systems Foundation, Inc. clearly recognizes the importance of informal learning — learning that responds to children’s curiosity and inherent need to explore the world through touch, feel, sound and observation — for that we are most grateful!”

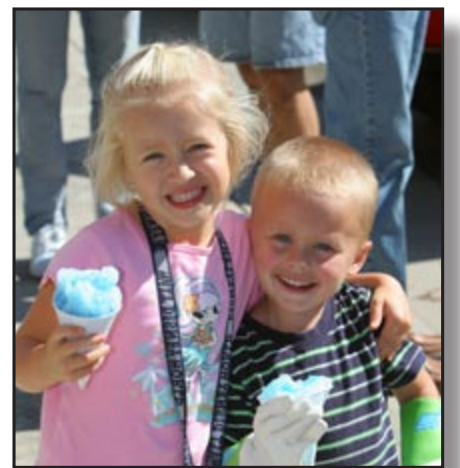

Debbie McKenzie, Children’s Discovery Museum

“This is First Class, High Performance, Family Fun at its BEST!”
